# CHILD

## Challenging of pre-schools for an innovative and creative Environment

### ABOUT THE PROJECT

CHILD recognizes that excellence in preschool education requires the corresponding training for gaining skills and practical resources to apply them, and as such its main objective is to provide the above to pre-school educators. The aim is to **train pre-school staff** in open education, social engagement, professional development, ethics, and impact. Regarding the sectoral priority of

**“Developing high-quality early childhood education and care systems”**, the primary aim of CHILD is to develop and reinforce a network of excellence in pre-school education which will increase the institutional capacity for a professional, high-quality, effective and needsbased childcare service to operate at transnational level and foster regional integration and cooperation.
