## Data Science for Good!

Digital Transformation describes a staggering task for our society and access to relevant knowledge is limited. The increasing demand for technical and methodological expertise in combination with domain knowledge significantly impacts the European job market. In this vein, a new job description as well as a new string of education emerged: Data Science.

### The Importance

Project EPSILON addresses the needs of both European Data for Good initiatives and HE institutions. Together with a leading European initiative, Data Science for Social Good Portugal, we will design tailored workflows and tools for European initiatives. We will set up a European Knowledge Platform and initiate a new Data for Good initiative in Lithuania. The gained experience and knowledge will be transformed into target group specific learning material for higher education students, teachers and alumni.

Progress of Results

## 3rd TPM in Cyprus

On the 26th and 27th of September 2023 Seit Lab from University of Cyprus had the great opportunity to host the 4th Transnational Project Meeting for the project of EPSILON.

During the TPM all the partners updated their progress on the project results.

After very important discussions very important points and decisions were made for the development of the platform.

Keep an eye out for this project since it's very promising!

Thank you to all the partners that attended, and we are looking forward to the development of this project.

## LTTA in Lisbon Portugal

14-16 November 2023

Throughout the last week, NovaSBE hosted engaging workshops and seminars full of invaluable insights into the applications of Data Science for promoting social and environmental impact.

This training event was designed to provide students with valuable knowledge and skills that can significantly benefit their academic and professional journey.

## Progress of Results

- Interviews took place where we gathered valuable information. A very insightful report is being made based on the findings.
- The platform development continues where we will implement a Business Toolkit.
- The platform will include:

- Best Practices Workflows
- Showcases
- QAs
- European Map with DSSG organizations
