

May Newsletter Project Updates!

The FEMSTEM team is proud of the work that has been completed and we cannot wait to share with you our updates!

Second in person meeting in Thessaloniki, Greece

Our second in-person project meeting took place in **Thessaloniki** on the 21st & 22nd of November 2024. The meeting was held at **Stimmuli's** offices and the FEMSTEM team discussed the progress of the project, such as the development of the **FemStem toolkit**, the development of the **Vlog Talks series** and started designing the **Digital Bridge**, the project's online platform.

Partners:

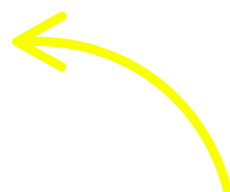

FEMSTEM Toolkit

Developed through **participatory design** with our four **co-creation groups** with women in STEM, students, academics, and professionals across partner countries, the FEMSTEM Toolkit offers **a rich set of resources to support the mentoring and empowerment of women in STEM fields.**

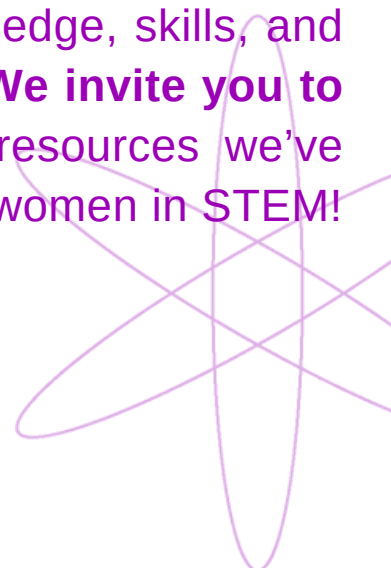

The Toolkit features:

- **Infographics** that map out clear **career pathways in various STEM fields**
- **Inspiring success stories** from women across partner countries.
- An **interactive Q&A** tackling common myths and misconceptions around women's roles in STEM.
- Practical **Short Courses**
- Scenario-based **Mentoring Activities** with the GROW model
- Forum

The Toolkit has been designed to cultivate the knowledge, skills, and confidence women need to thrive in STEM careers. **We invite you to explore the FEMSTEM Toolkit** and discover the resources we've created to inspire and support the next generation of women in STEM!

Toolkit!**

VlogTalks Series

Our VlogTalks Series aims to **empower women students** to not only **participate** in STEM but also **connect**, be **guided** and be **inspired** by **much needed role models** - Women STEM Academic and Industry Experts from 4 European countries.

These narratives are designed to help students **realise the potential opportunities**, the **impact** and the **prospects of a profession** in the **industry 4.0 era**.

School Chemistry in Action

A couple of months ago **Maite Artetxe** and **Maider Amutio**, **Chemical Engineers from UPV/EHU** - our FEMSTEM participants - spent a morning alongside students from Bilbao exploring the **fascinating potential of chemistry and chemical engineering**. Students worked on different hands-on experiments at the Faculty of Science and Technology, diving with excitement and curiosity into the world of chemistry.

Upcoming Activities

Between **May and July 2025**, the **National FEMSTEM Bridge Camps** with female STEM students will take place in each participating country - Cyprus, Greece, Lithuania and Spain. Students involved in the Bridge Camps will also have the chance to participate in **Work Shadowing Placements** with Industry and Academic Experts!
